Education

City University of New York
Ph.D., Physics, In Prog.
Fields: High Energy Astrophysics, Observational Astronomy
M.Phil., Physics, 2025.

University of Massachusetts Amherst
B.Sc., Astronomy & Physics, 2020.

Dissertation

"On the High Energy Emission from Compact Binaries"
My thesis utilizes γ-ray observations from the Fermi-LAT to understand the most energetic physical processes in deep space. We developed novel γ-ray likelihood stacking techniques to study the GeV emission from populations of compact objects in the Milky Way.

Publications

"An Optically Motivated Study of Gamma-ray Novae"
Owen K. Henry, Timothy Paglione, Joshua Tan, David Zurek, The Astrophysical Journal, August 2026, Accepted.

"A Gamma-ray Stacking Survey of Fermi-LAT undetected globular clusters"
Owen K. Henry, Timothy Paglione, Yuzhe Song, Joshua Tan, David Zurek, Vanessa Pinto, MNRAS, Volume 535, Issue 1, November 2024, Pages 434–442

"A comparison of mid-infrared spectral decomposition and full infrared spectral energy distribution modelling to quantify AGN in dusty galaxies:
The necessity of data between 6-14 microns"
Owen K. Henry, Alexandra Pope, Jed McKinney, Allison Kirkpatrick, Research Notes of the AAS, Volume 3, Number 12

Software

`nova-times`
Owen Henry & Destry Saul
`https://github.com/project-dovetail/nova-times`
Released: April 15th 2026

Research

Astrophysics, American Museum of Natural History
Visiting Scientist/Graduate Researcher
High Energy Survey Studies of Compact Objects with the Fermi-LAT, 2022-present
Supervisor: Dr. Timothy A.D. Paglione

Research (cont.)

Astronomy, University of Massachusetts Amherst
Undergraduate Researcher
Infrared Studies of Dusty Galaxies, January 2019-August 2020
Supervisor: Dr. Alexandra Pope

Physics, University of Massachusetts Amherst
Undergraduate Researcher
Examining the Shockty Anomaly of Rotating Black Holes, January 2020-May 2020
Supervisor: Dr. Jennie Traschen

Astronomy, Five College Consortium
Undergraduate Research Student (for ASTR 341: Observational Astronomy)
Observations of complex M-dwarf rotators with the WIYN 0.9m Telescope at KPNO, January 2020-May 2020
Supervisor: Dr. Kimberly Ward-Duong

Teaching

Astronomy, City University of New York
Workshop Coordinator & Peer Mentor, AstroCom NYC, 2023-present

Earth and Physical Sciences, CUNY York College
Adjunct Lecturer, Observations of the Sky, 2023-present
Reciation Instructor, Intro Physics I & II, 2023-present

Physics, CUNY Brooklyn College
Adjunct Lecturer, E&M Laboratory, August 2021-May 2023
Instructor, Intro Physics for Non-majors, August 2022-May 2023

New York Academy of Science, Global STEM Alliance
Scientist in Residence, SiR Program, August 2022 - September 2023

Physics, University of Massachusetts Amherst
Teaching Assistant, Computational Physics, September 2019 - December 2019

Conferences/ Workshops

241st Meeting of the AAS
January 2023
Poster: Gamma Rays in Globular Clusters

Fermi Summer School
May 2024
Talk: Gamma-rays from Globular Clusters (5/31/24)

22nd meeting of the HEAD of the AAS
October 2025
Talk: A Survey of Galactic Novae with Fermi-LAT (10/16/25)

Physical Sciences Jamboree at AMNH
November 2025
Served on LOC and SOC

Workshops (cont.)

CUNY Physics Spring Social
April 2026
Chair of LOC

Astrostat School - New York 2026
June 2026
Teaching Assistant

Rise_Time '26
August 2026
Poster: An Optically Motivated Study of Gamma-ray Novae (8/12/26)

9th Heidelberg International Symposium on High-energy Gamma-ray Astronomy
August 2026
Talk: On the GeV emission from Galactic novae (9/1/26)

Awards and Fellowships

Student Support Grant, New York Space Grant Consortium
2023

Student Event Award, CUNY Doctoral & Graduate Student Council
2026

Elected Positions

Program Representative, Physics, Doctoral and Graduate Student Council CUNY GC
2023-2026 (1-yr term length, annual election)

Students Mentored

Danispel Herrera (PhD. Student at Rutgers University)
Moises Acero (PhD. Student at CUNY Graduate Center)
Thyra Eysselinck (PhD. Student at George Mason University)
Samuel Candero (Post-baccalaureate researcher at AMNH)
Katie Howard (High School student in the NYC area)
